

# Chlorine Chemical Schedule

Start-Up Chemicals - Add these chemicals when refilling the spa.

Product Name	Amount to add	Purpose
Chlorine Granular	Add 2 ounces.	Disinfects and sanitizes spa water.
Calcium Hardness Increaser	Add 8 ounces.	Helps protect equipment from corrosion by raising the level of water hardness.
Shock / Shock Out / Super Oxidizer/Renew	Add 2 ounces.	Eliminates odors. Oxidizes dead organics and helps activate chemicals.
Stain & Scale / Metal Gone/Defender	Add 2 ounces.	Prevents metal and mineral buildup on the spa and equipment.

Weekly Chemicals - Add these chemicals once a week.

Shock / Shock Out / Super Oxidizer	Add 1 ounce per week. Add 2 ounces per week for larger spas.	Eliminates odors. Oxidizes dead organics and helps activate chemicals.
Stain & Scale / Metal Gone	Add 1 ounce per week. Add 2 ounces per week for larger spas.	Prevents metal and mineral buildup on the spa and equipment.

Every 1-2 days - Check water chemistry with a Spa Test Kit or Test Strips.

Chlorine Granulars	Add 1-2 ounces if Chlorine level is low.	Disinfects and sanitizes spa water.
Alkalinity Increaser / PH up	Add 1 or 2 ounces if PH and alkalinity tests are low.	Raises alkalinity level to help protect equipment from corrosion.
PH Decreaser / PH down	Add 1 or 2 ounces if PH and alkalinity tests are High.	Decreases PH level.

**Important: Never use hot tub if the chlorine level is low!!**

Chemicals listed are only basic chemicals used in a Chlorine system. Other chemicals can be used and are available. If you have any questions please call us. Thank You.
